February 9, 2016

Dear Parents/Guardians of upcoming 7th graders,

I am writing to notify you that Ohio law requires that all incoming 7th graders must have the Tdap and Meningitis vaccine prior to starting the 2016-2017 school year. Your child can either go through your own health care provider or through the Licking County Health Department. The phone number to the Health Department is (740) 349-6535.

As soon as your child has received these vaccines, or if your child has already received the necessary vaccines, please send in a copy to the school so that we can update his/her school medical records.

Please call if you have any questions or concerns.

Thanks for your help.

Heather E. Kee R.N.
