Passage 1: Speech on the
Challenger Disaster
by Ronald Reagan

On January 28, 1986, the space shuttle Challenger broke apart 73 seconds into its flight, killing all seven crew members. Many Americans were watching the launch live on television as on board the shuttle was Christa McAuliffe, who was to be the first teacher in space. President Reagan delivered this speech the day of the tragedy.

1. Nineteen years ago, almost to the day, we lost three astronauts in a terrible accident on the ground. But, we've never lost an astronaut in flight; we've never had a tragedy like this. And perhaps we've forgotten the courage it took for the crew of the shuttle; but they, the Challenger Seven, were aware of the dangers, but overcame them and did their jobs brilliantly. We mourn seven heroes: Michael Smith, Dick Scobee, Judith Resnik, Ronald McNair, Ellison Onizuka, Gregory Jarvis, and Christa McAuliffe. We mourn their loss as a nation together.

2. For the families of the seven, we cannot bear, as you do, the full impact of this tragedy. But we feel the loss, and we're thinking about you so very much. Your loved ones were daring and brave, and they had that special grace, that special spirit that says, "Give me a challenge and I'll meet it with joy." They had a hunger to explore the universe and discover its truths. They wished to serve, and they did. They served all of us.

3. We've grown used to wonders in this century. It's hard to dazzle us. But for 25 years the United States space program has been doing just that. We've grown used to the idea of space, and perhaps we forget that we've only just begun. We're still pioneers. They, the members of the Challenger crew, were pioneers.

4. And I want to say something to the schoolchildren of America who were watching the live coverage of the shuttle's takeoff. I know it is hard to understand, but sometimes painful things like this happen. It's all part of the process of exploration and discovery. It's all part of taking a chance and expanding man's horizons. The future doesn't belong to the fainthearted; it belongs to the brave. The Challenger crew was pulling us into the future, and we'll continue to follow them.
5. There's a coincidence today. On this day 390 years ago, the great explorer Sir Francis Drake died aboard ship off the coast of Panama. In his lifetime the great frontiers were the oceans, and a historian later said, "He lived by the sea, died on it, and was buried in it." Well, today we can say of the Challenger crew: Their dedication was, like Drake's, complete.

6. The crew of the space shuttle Challenger honored us by the manner in which they lived their lives. We will never forget them, nor the last time we saw them, this morning, as they prepared for the journey and waved goodbye and "slipped the surly bonds of earth" to "touch the face of God."¹

¹“slipped the surly bonds of earth” “touch the face of God”: quotations from “High Flight,” a poem by John Gillespie Magee, Jr.
Passage 2:
Remarks by the President on the Loss of Space Shuttle Columbia
by George W. Bush

On February 1, 2003, the space shuttle Columbia disintegrated over the southern United States as it re-entered Earth’s atmosphere, killing all seven crew members. President Bush delivered this speech the afternoon of the tragedy.

7. My fellow Americans, this day has brought terrible news and great sadness to our country. At 9:00 a.m. this morning, Mission Control in Houston lost contact with our Space Shuttle Columbia. A short time later, debris was seen falling from the skies above Texas. The Columbia is lost; there are no survivors.

8. On board was a crew of seven: Colonel Rick Husband; Lt. Colonel Michael Anderson; Commander Laurel Clark; Captain David Brown; Commander William McCool; Dr. Kalpana Chawla; and Ilan Ramon, a Colonel in the Israeli Air Force. These men and women assumed great risk in the service to all humanity.

9. In an age when space flight has come to seem almost routine, it is easy to overlook the dangers of travel by rocket, and the difficulties of navigating the fierce outer atmosphere of the Earth. These astronauts knew the dangers, and they faced them willingly, knowing they had a high and noble purpose in life. Because of their courage and daring and idealism, we will miss them all the more.

10. All Americans today are thinking, as well, of the families of these men and women who have been given this sudden shock and grief. You're not alone. Our entire nation grieves with you. And those you loved will always have the respect and gratitude of this country.

11. The cause in which they died will continue. Mankind is led into the darkness beyond our world by the inspiration of discovery and the longing to understand. Our journey into space will go on.

12. In the skies today we saw destruction and tragedy. Yet farther than we can see there is comfort and hope. In the words of the prophet Isaiah, "Lift your eyes and look to the heavens. Who created all these? He who brings out the starry hosts one by one and calls them each by name. Because of His great power and mighty strength, not one of them is missing."
13. The same Creator who names the stars also knows the names of the seven souls we mourn today. The crew of the shuttle *Columbia* did not return safely to Earth; yet we can pray that all are safely home.

14. May God bless the grieving families, and may God continue to bless America.
The authors of these passages address very related themes and concepts despite their speeches having different occasions. Write a response in which you make and support a claim about whether Reagan’s or Bush’s argument was more effective. Your response must be based on ideas and information that can be found in the “Rhetoric 9” passage set.

Manage your time carefully so that you can
• read the passages;
• plan your response;
• write your response; and
• revise and edit your response.

Be sure to
• use evidence from multiple sources; and
• avoid overly relying on one source.

Your response should be in the form of a multiparagraph essay.
